

ICO Basic Science Examinations

Educational Technology and reading list

This guide is not comprehensive but contains some of the texts which cover the areas to be studied to acquire the knowledge to pass the examination. It also contains some free-access websites and educational courses

If you have found a text (in any language), an educational course or a free-access website that you have found helpful, I would be grateful if you would let me know- dtaylor@icoph.org - in that way you will be able to help other candidates achieve a pass in the examinations and improve standards in Ophthalmology worldwide. Good quality, inexpensive, educational courses are particularly difficult to find!

This was produced by Sophie Jones and David Taylor.

Ethics

<http://priory.com/ethics.htm>

We would like to turn this list into a form of Wiki with a lot of content submitted by readers, particularly readers who are ICO Examination candidates or those who have recently passed the exam. There will have to be editorial control but if you have found any courses, books or websites particularly helpful- let me know! dtaylor@icoph.org We particularly need inexpensive courses anywhere in the world but particularly in Asia, Africa and the Americas and books & websites in non-English languages.
