

ICO Clinical Sciences Examinations Educational Technology and reading list

This list is a guide to useful texts, websites etc. It is not comprehensive but contains some of the texts which cover the areas to be studied to acquire the knowledge to pass the examination.

If you have found a text (in any language) particularly helpful, an educational course or a free-access website that you have found helpful, I would be grateful if you would let me know- dtaylor@icoph.org - in that way you will be able to help other candidates achieve a pass in the examinations and improve standards in Ophthalmology worldwide. Good quality, inexpensive, educational courses are particularly difficult to find!

This was produced by Sophie Jones and David Taylor.
Please help- see last paragraph

Books

Basic and Clinical Science Course (12 volumes) or CD Rom.

American Academy of Ophthalmology. On Disc or online. The 13-volume BCSC is a foundation for residents and a source of up-to-date clinical knowledge for practitioners. Revised annually, the BCSC covers everything from basic anatomy, optics, and pathology to such specialised topics as retina, glaucoma, and cataract. <http://www.aao.org/education/products/courses/index.cfm>

The AAO 'ONE' Network

From January 1st 2009 the AAO will offer, for no charge, access to the 'ONE' teaching facility for ophthalmologists in nearly 120 countries with a low GDPH. Access will be via their website:- www.aao.org/international/onenetwork.cfm

The Compass module is likely to be the most helpful for ophthalmologists wanting a structured learning experience.

Ophthalmic Pathology

Sehu KW, Lee WR

Blackwell Publishing. ISBN-13:978 0 727917 79 9

We would like to turn this list into a form of Wiki with a lot of content submitted by readers, particularly readers who are ICO Examination candidates or those who have recently passed the exam. There will have to be editorial control but if you have found any courses, books or websites particularly helpful- let me know! dtaylor@icoph.org We particularly need inexpensive courses

anywhere in the world but particularly in Asia, Africa and the Americas and books & websites in non-English languages.
